Tools

- git
- Make/Cmake
- Doxygen/Graphviz
- radare2
- LaTeX

Languages

Russian

English B2

Rogov Anatoliy

First year student of MIPT

Projects

Language compiler

December 2024 - Tools: C, Cmake, HTML, Graphviz

- Created language specification
- Lexical analysis with support for replacement table and detailed dump in debug mode
- Recursive descent parsing
- Support for tree standard
- Performing optimizations using middleware
- Representation in binary code for execution on the own processor

Mandelbrot

March 2025 - Tools: C/C++, Cmake, LaTeX

- Constructing a fractal of the mandelbrot set with the SFML library
- SIMD (AVX) computation optimizations
- Comparison of program execution time depending on the optimization level

Education

Moscow Institute of Physics and Technology (MIPT)
Dolgoprudny, Russia, September 2024 - June 2028

First year student of the Faculty of Radio Engineering and Computer Technologies. **GPA**: 8.1/10.0

System programming and compiler technology course (MIPT)
Dolgoprudny, Russia, September 2024 - June 2025

Completed the first semester with **GPA**: 10.0/10.0

Achievements

Prize-winner of the 2nd degree in Informatics at the Engineering Olympiad of Central Russia
Lipetsk, Russia, 2023
