Skills

C, C++

Asm

HTML

Tools

LaTeX, git

Make, CMake

Doxygen, Graphviz

radare2, gdb

Linux-Perf, Valgrind

Languages

Russian

English B2

Rogov Anatoliy

Second year student of MIPT

Projects

Language compiler

December 2024 - June 2025, Tools: C, Assembler, CMake, HTML, Graphviz

- Language specification
- Frontend: lexical and syntactic (recursive descent) analysis
- MiddleEnd: supporting for tree standard, performing optimizations
- Backend: representation in binary code for execution on the own processor

Mandelbrot

March 2025, Tools: C, CMake, SFML, LaTeX

- Constructing a fractal of the mandelbrot set with the SFML library
- SIMD (AVX) computation optimizations
- Comparison of program execution time depending on the optimization level

Hash-Table

April 2025, Tools: C, CMake, Linux-Perf, Valgrind

- Creating a hash table structure
- Analyzing its performance and implementing of optimizations

ONNX-Frontend

February 2026, Tools: C++, CMake, Graphviz

- Parsing ONNX format file to upload ai model
- Dump Graphviz computational graph

Education

Moscow Institute of Physics and Technology (MIPT)
Dolgoprudny, Russia, September 2024 - June 2028

Second year student of the Faculty of Radio Engineering and Computer Technologies. **GPA**: 8.04/10.0

System programming and compiler technology course (MIPT)
Dolgoprudny, Russia, September 2024 - June 2025, **GPA**: 9.0/10.0

Introduction to tensor compilers course (MIPT)
Dolgoprudny, Russia, February 2026 - May 2026

Introduction to computing systems architecture (MIPT)
Dolgoprudny, Russia, February 2026 - May 2026
